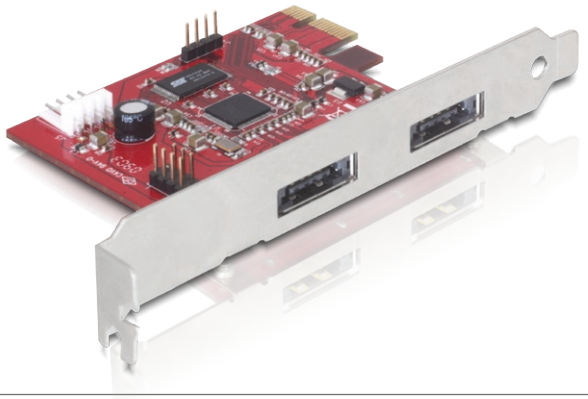
PCI Express Card > 2x Power Over eSATA 5V/12V



Ref. 89233
EAN 4043619892334

Description

This PCI Express Card expands your PC by two Power Over eSATA ports. This interface enables you to connect not only Power Over eSATA devices but also standard eSATA and standard USB devices, like external enclosure, card reader etc. The combination of eSATA and USB in one port enables the power supply via USB, so that you do not require any power supply when using a 2½" Power Over eSATA enclosure.

The internal 12V connector of the PCI Express card provides you an external connection for additional products e.g. 3,5" HDD, which require more than 5V. Therefor you can use optional connecting cables by Delock.
